The difference of onboarding vs. OSHA 10

- **How can employers blend traditional onboarding and site specific training?**
- Initial process for Onboarding Workers: At the right time at the right cost & blended with site specific training
- Raising the bar of safety expectations for your site, your workforce and your company this with insight-driven tools minimize risk.

Technology's Role in OSHA 10 Training

- **What is the value, and what do employees learn**
 - The 10-hour course initiates the onboarding process of a good foundation.
- **Where technology can help blend entry-level topics and employer requirements**
 - Easy-to-use software and tracking solution can provide you a historical and future view of your safety programs
 - They can help identify Risk Waste by training employees to recognize potential incidents before they happen
 - Training empowers your employees helping you not only attract and retain talent, but keep a positive reputation as a safe workplace
- **Value**
 - Peace of mind in managing Safety, a proven tool to initiate training and blended with a required training and reporting tool can provide cost savings and improve overall performance.
